RELEVANT EXPERIENCE

GOWell, Houston TX — *Software Engineer*

June 2023 - August 2023

This role has a focus on software engineering efforts. Including development, design, implementation, test, deploy, and providing training for R&D projects. This role focuses on **integrating AI** into our products and developing a **cloud based software**.

HP, Houston TX — *Software Developer, Intern*

June 2023 - August 2023

As a full-stack developer during my internship, I utilized **React**, **Typescript**, and **Golang** to enhance both the **front-end** experience and the **back-end API** of our product. I surpassed what was expected of me on this project.

H-GAC, Houston TX — *Webmaster, Intern*

Aug 2021 - June 2023

As a full-stack webmaster, I was responsible for the development and maintenance of our website. My role involved creating web forms and various web components, which included tasks such as database management, user input validation, payment processing, and email confirmation. I accumulated two years of experience working in our full-stack development team. My toolkit included Kentico (CMS), HTML, CSS, JavaScript, and ASP.net (C#).

RESEARCH & PROJECTS

University of Houston — *Web Development & Research*
June 2021 - June 2023

Light-Duty Vehicle GHG Emissions: A Transparent, Dynamic Model

I worked on two research projects. The first one involved taking an excel based model and making a web based version of it. I fully build and deployed it using **Flask, Javascript, HTML, and bootstrap.**

The second project involved direct research on Electric Vehicle emissions. Using **linear regressions** and other **statistical models**.

For more detailed information, please refer to the accompanying White Paper and Web Pages.

EDUCATION

University of Houston, Houston TX — *Computer Science - BS*

August 2020 - December 2023

As a member of the honors college, I maintained a 3.7 GPA while doing research and internships alongside my education.
